GreenLine

Decarbonising heavy trucking

GreenLine Mobility Solutions Ltd

Accelerating carbon neutrality with ‘conscious corporates’

Table of Contents

1 Introduction to Greenline

2 Fleet and Ecosystem

3 Technology and Operations

4 GreenLine’s Journey Towards a Net Zero India

About Us

Vision

To decarbonize heavy freight transportation in India, resulting in **1 mn ton CO2** emission reduction in 3 years by deploying **10,000 LNG & EV vehicles.**

Mission

Transform the logistics industry with the largest and the only fully integrated green mobility solution in the country.

Proposition Statement

Accelerate carbon neutrality through decarbonisation of roadlogistics.

We Deliver

3. Logistics On Time
- Cargo Monitoring
- Real Time Insights

2. Assurance
- Fleet Health Assurance
- End-to-end Operational Visibility

4. Emission Reduction*
- **40%** CO_2 I **91%** PM
- **100%** SO_x I **59%** NO_x
- **70%** CO I **30%** Noise Pollution

1.Safety
- Reduced on Road Accidents & Incidents
- Compliance with Plant HSE Norms
- Lower Insurance Risk Exposure

5. Green Certificate
- Third Party Audited Green Certificated
- CO_2 Reductions are ESG-reportable.

*Maximum Achievable Value
A 40% reduction in a 1-tonne CO_2 baseline is equivalent to planting ~18 mature trees.

Fleet and Ecosystem

Integrated Green Mobility Ecosystem

One ecosystem. One accountability. End-to-end decarbonisation of heavy logistics.

BLUE ENERGY MOTORS

Partner
Designs and manufactures LNG & EV heavy-duty fleet

- Custom truck configurations for routes
- Continuous feedback loop from fleet operations to improve fleet technology
- Manufactures purpose-built green clean fleet

GreenLine

ULTRA GAS & ENERGY

Subsidiary
Fuel and Infrastructure Backbone

- Develops pan-India LNG fuel Retail Outlets
- Infrastructure planned in sync with GreenLine routes
- High-safety, industrial-grade fueling standards
- Removes fuel risk and enables long-range green logistics at scale.

What makes this ecosystem different

- Route insights from GreenLine feed back into BEM fleet design
- Fleet expansion plans drive UGEL station deployment
- Infrastructure readiness enables new customer routes
- Single governance across vehicle, fuel, and operations

Result:
No fragmentation. No dependency risk.
One accountable green logistics system.

Dual Zero-Emission Roadmap: LNG

- LNG Emissions Reduction
- Up to 40% CO_2 I 91% PM
  100% SO_x I 59% NO_x I 70% CO
- No impact on payload
- Suitable for 24×7 industrial routes
- Lower noise pollution

Long Range — LNG

Up to
1,400km
on Single Fill

Up to
2,800km
on Single Fill,
Double Tank

Dual Zero-Emission Roadmap: EV

Challenges for EV Adoption

- Range Anxiety
- Long Charging Time
- High Upfront Investment
- Limited Charging Infra
- High TCO

Solutions for EV Adoption

- Up to 150-200 km on a single swap
- >5 mins Quick Battery Swap
- Network of Swap Stations
- Battery-as-a-service
- Lowest TCO

Wide Range of Applications

1 Side Wall Trailer

2 Flatbed Trailer

3 Tipper Trailer

4 Tanker

5 Containe

Suitable for

55 MT GVW

6 Bulker

Technology & Operations

Smart Fleet & Command Centre

Fleet Management

GEO Fencing

Fuel Management

Trip Management

Vehicle Tracking

Driver Management

Report and Analytics

Alerts and Notifications

Proactive Vehicle Service Support

- **OEM tested LNG Tank & EV Battery**
- **6 Level-1 ADAS Cameras**
  (Inside the cabin, Road facing on the prime mover, 2 on either side, Load Area, Behind the truck
- **120 Telematic Data Sensor Points**
  (Monitors Fleet health & Enables Predictive alerts)
- **24*7 Command Centre Monitoring**
  (Distraction, Drowsiness, Over speeding, Fuel management, Idling, Potential collision)
- **100% Fleet Ownership & Management**
- **ISO-Certified**
  (45001, 39001, 9001, 14001)

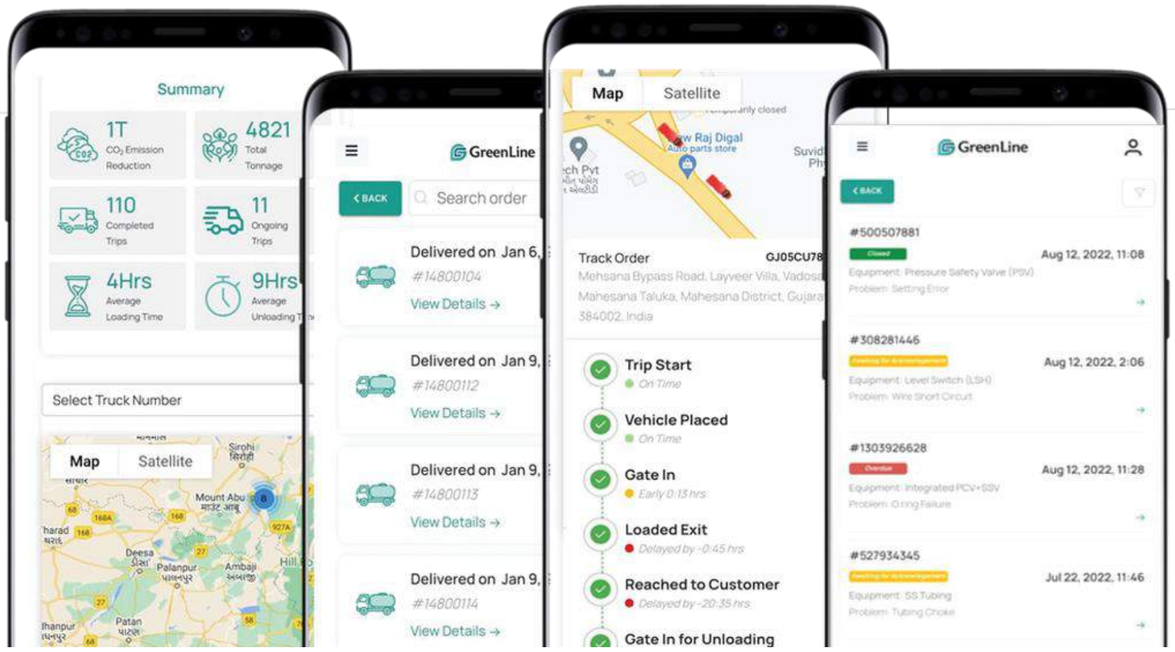
Stakeholder Experience

Real-time **Order Tracking** & delivery arrival times

Order details and Invoices available at a single click

Multiple user logins with predefined roles

A B2C experience in a B2B business.



Ticket creation, tracking, closure and feedback mechanism.

Integrated Ecosystem

Hassle Free Coordination

Fuel Infrastructure

Accountability

Consistent Operations

GreenLine's Journey Towards a Net Zero India

Green Certificates & Carbon Clock

Our in house Carbon Clock keeps track of CO_2 reduction and tree savings, offering hope for a greener future.

Committed to Decarbonisation

27,857 tn
Carbon Emissions Reduced

11,14,314
Trees Equivalent

Data as on 13-08-2026

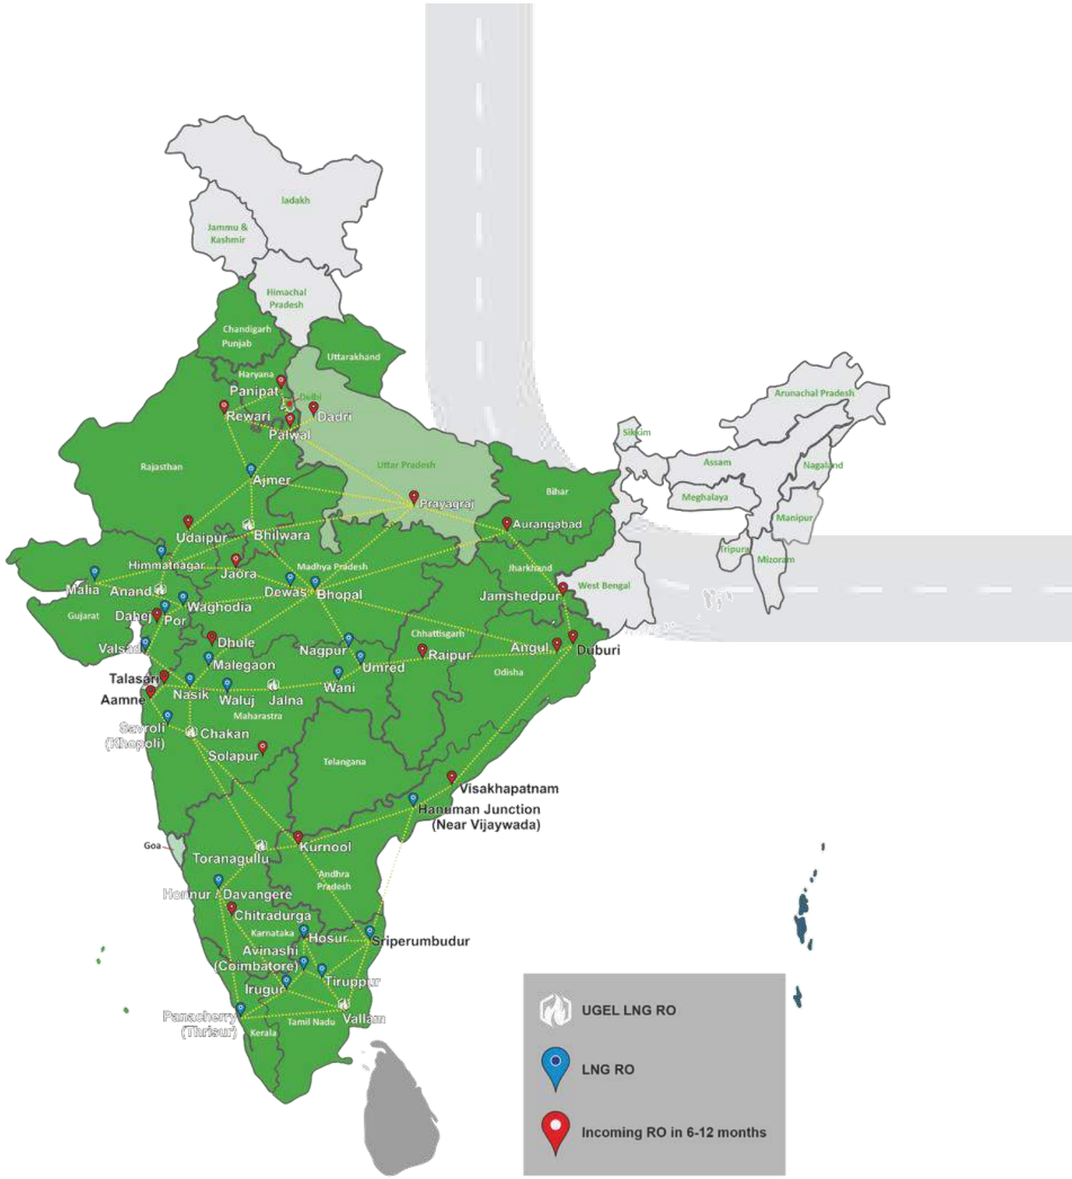
- **First Logistics company to issue** CO_2 emission reduction certificate
- Clients can officially account for their CO_2 reduction in their **ESG** reports
- Will facilitate **Improvements in ESG scores** of Greenline clients
- Issued by EKI, **Globally best provider of verification and assurance services** for environmental risk accounting and appropriate management

Sustainable logistics enhancing organisation ESG Perormance

India Goes Green

Currently operating in Uttrakhand, Punjab, Haryana, NCR, Rajasthan, Gujarat, Madhya Pradesh, Maharashtra, Andhra Pradesh, Karnataka, Kerala, Tamil Nadu, Chattisgarh and Odisha.

LNG Station are operational at Ajmer, Bhilwara, Anand, Himmatnagar, Malia, Waghodia, Por, Valsad, Dewas, Bhopal, Malegaon, Nagpur, Umred, Nasik, Jalna, Waluj, Wani, Savroli, Chakan, Toranagullu, Honnur, Hosur, Avinashi, Irugur, Panacherry, Vallam, Avinashi, Tirupur, Sriperumbudur and Hanuman Junction.



Pan-India Expansion is being Driven by the Rollout of new LNG Stations

India’s Green Freight Vision (2030-2035)

Industrial supply chains becoming green

Pan-India fueling + swapping network

EV penetration in short/mid-haul

Large-scale LNG adoption for long-haul

GreenLine is positioned to lead this transformation.
